

## [INS2020: International Neuropsychological Society Meeting](#)

### **DATE & PLACE:**

February 5 – 8, 2020.

Denver, United States of America.

### **HOW TO ENROLL:**

You have to register yourself at the following link:

<https://www.the-ins.org/meetings/denver2020/registration/>

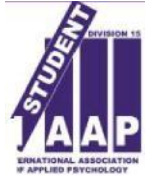

The theme for the 2020 Annual Meeting in Denver is: *Neuropsychology in the Era of Precision Medicine*. Precision medicine, broadly defined, refers to the ways in which treatments can be optimized to align with the particular characteristics of an individual and to reflect person-specific variability in biology, environment, and lifestyle. From its early days as a discipline, neuropsychology has embraced the importance of considering “the individual” and the utility of an assessment approach that is flexible

and adaptable. As contemporary medicine enters this new frontier marked by deeper appreciation for the ways in which an individual's genetic and environmental makeup shape their susceptibility to disease and response to treatment, it is important for our discipline to renew this long-standing perspective and highlight the key role that neuropsychologists play in precision medicine.

### TOPICS:

- ADHD/Attentional Functions
- Aging
- Anoxia/Hypoxia
- Assessment/Psychometrics/Methods (Adult)
- Assessment/Psychometrics/Methods (Child)
- Autism Spectrum Disorders/Intellectual Disability
- Cancer
- Cognitive Intervention/Rehabilitation
- Cognitive Neuroscience
- Concussion/Mild TBI (Adult)
- Concussion/Mild TBI (Child)
- Dementia (Alzheimer's Disease)
- Dementia (Non-AD)
- Drug/Toxin-Related Disorders (including Alcoholism)
- Emotional and Social Processes
- Epilepsy/Seizures
- Executive Functions/Frontal Lobes
- Forensic Neuropsychology/Malingering/Noncredible Presentations
- Genetics/Genetic Disorders
- Inclusion and Diversity/Multiculturalism
- Infectious Disease/Encephalitis/Meningitis (including HIV/AIDS)
- Language and Speech Functions/Aphasia
- Learning Disabilities/Academic Skills
- Medical/Neurological Disorders/Other (Adult / Child)
- Memory Functions/Amnesia
- Mild Cognitive Impairment (MCI)
- Mood & Anxiety Disorders
- Movement and Movement Disorders
- Multiple Sclerosis/ALS/Demyelinating Disorders
- Neuroimaging
- Neurophysiology/EEG/ERP
- Neurostimulation/Neuromodulation
- Neuropsychiatry/Psychopharmacology
- Prematurity/Low Birth Weight/In Utero Teratogen Exposure
- Schizophrenia/Psychosis
- Stroke/Cerebrovascular Injury & Disease (Adult / Child)
- TBI (Moderate-Severe, Adult / Child)
- Visuospatial Functions/Neglect/Agnosia

## IAAP DIVISION 15 – ACTIVITIES IN NORTH AMERICA

### IMPORTANT DATES:

- **June 7<sup>th</sup>, 2019:** Abstract Submission Opens.
- **August 23<sup>rd</sup>, 2019:** Abstract Submissions Closes.
