Table of Contents of July E-News: June-July, 2022  
• Key Activities of Division of Professional Practice  
• Forthcoming events of professional interest  
• Items / resources of interest  
• Snapshot of Events over the past month  
• The World in the time of COVID  
Appendix: Previous items/resources of interest

Key Activities/News of Division of Professional Practice (June-July, 2022):  
• IAAP Board Meeting: July 4th & 5th: We were represented at the IAAP Board meeting by our incoming President: Susan McDaniel. Amongst multiple other agenda items, there were three key issues of relevance to Division 17:  
  o The motion to reverse the term of the Pres-Elect and the Past-President from 2-years back to 4-year terms, to match the 4-year term of the President. The IAAP Board decided to reinstate 4-year terms as those doing these roles were continuing to do the work over the 4-year period.  
  o CANCELLATION: The July, 2023 IAAP Board meeting and ICAP in Beijing has been cancelled - due to ongoing concern about the COVID situation in China. There will therefore be a meeting of the IAAP Board from July 3-6, 2023 in Brighton England, in advance of the ECP (European Psychological Congress). Members of our Division Executive will attend and, as has been the case at International Congresses since 2010, will plan to run a multi-national Symposium at the ECP on “The Role of Psychology in Integrated Health Care: An International Perspective”.  
  o United Nations Activity: We raised with the IAAP Executive, both before and at the IAAP Board meeting, the role and importance of our interactions with the UN/WHO.
This was addressed in the IAAP President’s Report with reference to three key documents:

- “Applied Psychology Around the World: Applied Psychology at the UN”; September, 2019
- Mission Statement of Applied Psychology at the UN
- UN Paper: Integrating Mental Health Care into Primary Care

**Succession Planning and Handover:**

- A key focus for our Division 17 Executive over the past few months has been the smooth transition (30th July, 2022) to our new team and incoming President (Susan McDaniel: 2022-2026) from current President: Robyn Vines (2018-2022) and the appointment of President-Elect (Tim Carey: 2024-2026). These appointments have now been confirmed and our Executive team has grown to include Professors Tim Carey (Australia), Nancy Ruddy (USA) and Jude Gullifer (Australia), and Dr. Christine Jehu who will assist with our website re-design, in addition to the previous Executive: Robyn Vines (Australia), Susan McDaniel (USA), James Bray (USA) and Diana Prescott (USA). We are keen to welcome new members from different parts of the world to increase the diversity of our representation, so please contact us if you would like to make a contribution.

- **Invitation to attend our Handover Meeting:** 5.00pm Tuesday 26th July (NYC time)/7.00am Wednesday 27th July (Sydney time)
  - We would like to celebrate the hand-over to the next Executive Team in an online event with our members. This is an idea that was developed by Division 8 to transition to their new team and we feel it’s equally applicable to Division 17: Professional Practice.
  - There are many reasons to celebrate this transition, with the increase in the size of our Executive team and our new Division President: Professor Susan McDaniel starting in her role and presenting some of her plans. Past Presidents, our President-Elect and other members of our Executive team will also join the event and we hope that you can join the event, too!
  - We invite all interested to join our meeting (details above)

**Program**

- 17:00 - Welcome words by the outgoing President: Dr. Robyn Vines (“Master of ceremonies”)
- 17:05 - Farewell of outgoing president, words by Professor James Bray
- 17:10 - Presidential address by incoming President: Professor Susan McDaniel outlining proposed continuities and new directions
- 17:30 - Statement by our secretary: Dr. Diana Prescott
- 17:35 - Statement by new communication officer: Professor Nancy Ruddy
- 17:40 – Discussion with Past Presidents: Prof. James Bray and Dr. Robyn Vines with those attending
**International Congresses:**

Professor Judith Gullifer (Monash University, Australia) is now our ‘Division 17 Congress Coordinator/Manager’ for ICAP, Beijing’ 2022/2023 and ECP, 2023 (to be held in Brighton, UK; July, 2023).

(Please email Judith: with lecture, symposia and poster ideas: judith.gullifer@monash.edu)

- July 5-8, 2022: Professor James Bray and Dr Diana Prescott will attend the 17th European Congress of Psychology in Ljubljana, Slovenia, presenting a paper on the role of psychology in integrated mental and general health care (see below)
- July 3-6, 2023: As highlighted above, the European Congress of Psychology: Brighton, UK – Members of our Executive team will attend the IAAP Board meeting prior to the Congress, and will submit a Symposium on “The Role of Psychology in Integrated Health Care: an International Perspective”

As with previous International Congresses (since ICAP in Melbourne in 2010 – ICAP: Paris: 2014, Montreal: 2018; ICP: Capetown: 2012; Okinawa: 2016; Prague: 2020/2021; ECP: Stockholm: 2013; Milan: 2015; Amsterdam: 2017; Moscow: 2019) - Our Executive Team will run Division 17 Symposia on “The Role of Psychology in Integrated Health Care: An International Perspective”. These collegial events provide an opportunity to meet like-minded psychologists who are trying to reform our national health systems to include multi-disciplinary care enabling provision of a true bio-psycho-social model of care, which the WHO supports as ‘best practice’ in both general and mental health care. Please be in touch if interested.

**Focus on Integrated Health Care:** The Division of Professional Practice is one of the newest IAAP Divisions (founded in Berlin in 2008). We have also been one of the most active with a key focus being the development and promotion of psychology as a key player in integrated primary and secondary health care, not only nationally but globally (see UN paper mentioned above which we helped to write) . A number of our Executive team are international experts in this important area and our three recent webinars (outlined below) and aspects of our monthly E-News contributions have emphasised work in this area. This will remain a key focus for the term of Susan McDaniel’s Presidency – the aim being to raise the profile of the important role psychology has to play in both mental and general health care at all levels.

**Webinars:**

Division 17 webinars: Available on the IAAP Website:

29.3.22: ‘Integrated primary care and the science of teamwork’: Professor Susan McDaniel: incoming Division 17 President (30.7.22) and Professor Eduardo Salas provided a stimulating webinar on ‘Integrated primary care and the science of teamwork’ on 29th/30th March, 2022. Given the ‘over-lapping content’, the webinar was created as a joint initiative between Divisions 1 (Organisational Psychology) and Division 17 (Professional Practice) – hopefully a precedent for further collaborative, cross-Divisional activities within IAAP.

(see earlier work of Professors McDaniel and Salas on APA PsycNet: https://doi.apa.org/doiLanding?doi=10.1037%2Famp000034)

9.10.21: “The role of psychology in integrated healthcare: Migraine, a work in progress”
https://iaapsy.org/members/webinars/the-role-of-psychology-in-integrated-healthcare/

15.5.19: “The Critical Role of Psychology in an Integrated Primary Care Model”

**Ongoing Monthly E-News - see:** https://iaapsy.org/divisions/division17/

Each month during the course of the year (January to December), we provide a monthly ‘reflection’ on current events, including a ‘snapshot’ of the changing statistics in relation to the pandemic: “The World in the Time of COVID”.
Advance notice/forthcoming events:

Events:

APA (AMERICAN PSYCHOLOGICAL ASSOCIATION) CONFERENCE: Psychology is here:
MINNEAPOLIS & VIRTUAL: AUGUST 4-6

APA 2022 is where practitioners, researchers, educators, and applied psychologists from around the world come together to share transformative ideas and explore the most compelling issues in the discipline. This year we’re excited to offer three days packed with more than 900 in-person sessions in Minneapolis, numerous social and networking events, and two virtual livestream channels. Psychology will be here at APA 2022 — will you join us?

See: https://convention.apa.org/

Items/resources of interest:

June-July, 2022: (with thanks to the APA, APS, PBS, ABC – and other sources)
(For previous items/resources of interest from Division 17 E-News, see Appendix below)

- APA STATEMENT: Reaction to Texas Mass Shooting
  Statement by Frank C. Worrell, PhD, president of the American Psychological Association: in response to the mass shooting at an elementary school in Uvalde, Texas, that left at least 21 people dead, 19 of them children.
  “It is long past time to act to ensure that schools are safe havens for our children”, says APA’s president.

- The Science Behind Creativity: Psychologists and neuroscientists are exploring where creativity comes from and how to increase your own.
  https://www.apa.org/monitor/2022/04/cover-science-creativity

- How to Assess and Intervene With Patients at Risk of Suicide:
  Suicidal ideation is on the rise. Recent advances in clinical research have identified critical and effective treatments.
  https://www.apa.org/monitor/2022/06/continuing-education-intervene-suicide
  APA Sponsored Webinar: Caring for Suicidal Patients: A look at how to support clinicians and family members caring for those struggling with suicidal behavior.
  https://zoom.us/webinar/register/WN_EJ33-wWzRQ6yo-eVN7Kq2Q
  (June 10th, 2022 – accessible via APA website)

- Loneliness, the costly silent killer: Julian Morrow on ‘The Roundtable’
  https://www.abc.net.au/radionational/programs/the-roundtable/13942606
Health advocates are calling on the new Albanese Government to appoint a Minister of Loneliness.

The title Minister of Loneliness almost sounds comedic but the UK and Japan each have a Government Minister to address what’s now being described as a global epidemic of social isolation and loneliness.

The World Health Organisation has taken up the cause saying loneliness is a major contributor to ill health and it’s not just an issue for older people.

A study by researchers at Curtin University in WA puts the economic cost of poor health outcomes due to loneliness at nearly 3-billion dollars each year in Australia.

Guests:
- Alana Officer, Head World Health Organisation Demographic Change and Healthy Ageing Unit
- Dr Michelle Lim, Clinical Psychologist, Chief Scientific Advisor, Ending Loneliness Together organisation
- Phil McAuliffe, Creator, The Lonely Diplomat website

**Unraveling the Mystery of Lyme Disease:**
Research shows the oft-misdiagnosed tick-borne disease can lead to serious mental health problems that can erode a person’s quality of life.
https://www.apa.org/monitor/2022/06/feature-lyme-disease

**Standing Tall: A New Stage for Incompetency Cases:**
A growing number of people with serious mental illness are entangled in the legal system instead of receiving proper mental health care.
https://www.apa.org/monitor/2022/06/feature-incompetency-cases

**Improving Traffic Safety:**
U.S. traffic fatalities started rising 2 years ago after several years of declines. Psychologists around the world are looking for ways to make driving safer for everyone:

**June-July, 2022: “Snapshot of Events”:**

**Overturning of Roe vs Wade by the Supreme Court in America: 24.6.22**

**Ongoing war in Ukraine: missiles strike Kyiv as G7 meets in Austria: 27.6.22**

The past month has continued with the traumatic, ongoing war in the Ukraine - affecting all of us. President Volodymyr Zelensky has said that the war in Ukraine can only be resolved through "diplomacy" and that the war could only come to a conclusive halt "at the negotiating table". Heavy fighting taking place in and around Severodonetsk (22.5.22) has resulted in a 'second Mariupol' with untold devastation, as Russian forces step up efforts to seize the whole of the Luhansk region. It continues to be exceedingly distressing watching these events unfold daily/nightly on our television screens – affecting both our patients and ourselves as practitioners. Our role as psychologists is to listen, instil hope, empowerment and
the 19 vaccination rates stand at 7.35% for the continent, with many countries hovering around 1%, according to

We again wish to highlight the IAAP statement on Ukraine indicating our: “deep concern about the military and humanitarian offenses the Russian Federation is carrying out in Ukraine, resulting in ongoing devastating loss of life and attack on innocent civilians. We strongly condemn this unjustified aggression and stand in solidarity with the people of Ukraine”.
(see: https://iaapsy.org/about/human-rights-statement/ukraine/)

- The G7 meets in Austria” 27.3.22
- UK: Conservative Prime Minister Boris Johnston survives a ‘confidence vote’: 7.6.22
  https://www.youtube.com/watch?v=s8-Fcqf6RgE
- New Government in Australia: 21.6.22: Writing on 22.5.22: it is less than 24 hours since Australia voted in a new Government: “The Australian people have spoken, and the big winners are Labor and the "teal" independents” (ABC News). Australia’s new leader: Anthony Albanese, and his ALP colleagues, together with the Greens independents, have vowed to take the country in a new direction, with a big shift in climate policy. This is a time of optimism with big implications for health, education, climate policy, equity – and a new direction for the country.

The World in the Time of COVID-19:
(see: https://covid19.who.int/)
The WHO Coronavirus Disease ‘dashboard’ indicates that there are now (23.6.22) 539,893,858 confirmed cases of COVID-19, an increase of more than 17.9 million registered cases in the past month - with 6,324,112 deaths from COVID-19 world-wide  ... (compared to previous months’ figures: 23.5.22: 521,920,560 confirmed cases and 6,274,323 deaths; 25.4.22: 505,817,953 cases and 6,213,876 deaths; 28.3.22: 476,374,234 confirmed cases and 6,108,976 deaths; 22.2.22: 422,188,754 cases, 5,876,766 deaths; 21.1.22: 340,543,962 cases, 5,570,163 deaths; 27.12.21: 279,114,972 confirmed cases, 5,397,580 deaths; 23.11.21: 256,966,237 cases, 5,151,643 deaths; 25.10.21: 243,260,214 cases, 4,941,039 deaths; 21.9.21: 228,394,572 cases, 4,690,186 deaths; 23.8.21: 211,373,303 cases, including 4,424,341 deaths; 26.7.21: 192,284,207 cases; 4,136,518 deaths; 22.6.21: 178,202,610 confirmed cases; 3,865,738 deaths; 23.5.21: 166,346,635 confirmed cases, including 3,449,117 deaths; 5.21: 152,535,452 cases, 3,198,528 deaths; 22.3.21: 22,524,424 cases, 2,703,620 deaths; 22.2.21: 111,102,016 cases, 2,462,911 deaths; 25.1.21: 99,363,697 cases, 2,135,959 deaths; 28.12.20: 79,673,994 cases, 1,761,381 deaths; 23.11.20: 57,882,183 cases, 1,377,395 deaths; 29.10.20: 43,766,712 cases, 1,163,459 deaths; 26.7.20: 15,581,009 cases, 635,173 deaths; 20.6.20: 8,385,440 cases, 450,686 deaths; 26.4.20: 2.8million cases, 200,000 deaths). It is estimated that the true prevalence is likely to be at least double this, with these figures representing a gross underestimate due to being based on ‘formal testing and reporting’ which continues to diminish.

Vaccinations: As of 20.6.22: 11,912,594,538 of COVID-19 vaccines have been administered worldwide. These latest formal figures are surprising as previous months’ figures suggested a higher rate (22.5.22: 12,186,798,032 doses; 17.4.22: 11,324,805,837 doses; 26.3.22: 11,054,362,790 vaccine doses; 20.2.22: 10,407,359,583; 18.1.22: 9,571,633; 27.12.21: 8,649,057,088; 21.11.21: 7,408,870,760 vaccine doses; 20.10.21: 6,655,399,359; 17.9.21: 5,776,127,976; 19.8.21: 4,562,256,778; 24.7.21: 3,646,968,156; 16.6.21: 2,413,847,050 vaccine doses). Sadly, the majority of these have been given in the developed world with less-well-off continents/countries still lagging (e.g. in Africa: COVID-19 vaccination rates stand at 7.35% for the continent, with many countries hovering around 1%, according to the Africa Centers for Disease Control)
As we write: In Australia and elsewhere, the number of new Covid-19 cases remains high, albeit below its most recent peaks, although hospitalization and fatality rates (as a proportion of active case numbers) remain low.

**April-May, 2022**

Prolonged Grief Disorder recognised as a mental health condition

The age-old saying “time heals all wounds” may be relevant for some, but for others grief is an ongoing and debilitating disorder. This year American Psychiatric Association has recognised ‘Prolonged Grief Disorder’ as an official psychiatric illness in its Diagnostic and Statistical Manual of Mental Disorders. Guest: **Dr Katherine Shear**, Director of the Center for Prolonged Grief and Marion E. Kenworthy Professor of Psychiatry at Columbia University Producer - Katie Fuller; **Duration:** 12min 30sec **Broadcast:** Sun 3 Apr 2022, 7:36am
**The Burden of Weight Stigma:** The increase in weight gain linked to the COVID-19 pandemic is taking a psychological toll, because weight stigma—bias against individuals because of their body size—is also on the rise. Weight stigma increases a person’s risk for mental health problems and undermines health behaviors and preventive care, causing disordered eating, decreased physical activity, health care avoidance, and weight gain. Psychologists are researching interventions for disrupting the pattern. See: https://www.apa.org/monitor/2022/03/news-weight-stigma

**How To Keep Anger From Getting the Best of You:** How do you keep anger from rising to a level that interferes with your health and happiness? Howard Kassinove, PhD, of Hofstra University, and Raymond “Chip” Tafrate, PhD, of Central Connecticut State University, joined APA’s Speaking of Psychology podcast to discuss the difference between healthy and harmful anger, strategies to cope with anger, and why primal screams, rage rooms, and other forms of anger catharsis can do more harm than good. COPING WITH TRAUMA:

- **As a Crisis Hotline Grows, So Do Fears It Won’t Be Ready**: The National Suicide Prevention Lifeline (USA) will have its own three-digit number, 988, starting in July—a shift that is expected to grow exponentially the number of callers over the next few years. The increased access is important, but experts say that more funding is needed to effectively staff the line. Roughly 17% of the lifeline’s two million calls last year were abandoned before a caller could get help, as reported by *The New York Times*. Read more from APA about crisis lines during the pandemic. [https://www.nytimes.com/2022/03/13/us/suicide-hotline-mental-health-988.html](https://www.nytimes.com/2022/03/13/us/suicide-hotline-mental-health-988.html)

  Even when COVID-19 recedes, Americans will still be left with the trauma the virus has left in its wake, including more than 140,000 children who have lost a parent or caregiver. APA CEO Arthur C. Evans Jr., PhD, spoke with CBS News about the need to address the ongoing mental health crisis. “Because what we know from research is that when people experience these kinds of traumas—after 9/11, or Hurricane Katrina—we expect to see people experiencing problems for at least another seven to ten years out,” Evans said.

- **American’s Stress is Spiking Over Inflation and War in Ukraine**:  
  The APA’s newest ‘*Stress in America*’ survey found that over 80% of Americans said inflation, global uncertainty, and issues related to invasion of Ukraine are significant sources of stress. This is the highest number of people who have said they’re significantly stressed about any issue in the 15 years APA has conducted this survey. “Typically, our highest levels of stress have been in the mid-60%s, so hitting, for example, 87% for inflation as a source of stress is truly astounding,” said psychologist Vaile Wright, PhD, APA’s senior director of health care innovation in an NPR article: [https://www.apa.org/news/press/releases/stress/2022/march-2022-survival-mode](https://www.apa.org/news/press/releases/stress/2022/march-2022-survival-mode)

- **Navigating thorny topics in therapy**: Clinicians and ethics experts share guidance on maneuvering disclosures about politics, religion, and other hot-button topics that can affect the therapeutic relationship: [https://www.apa.org/monitor/2022/03/career-navigating-therapy](https://www.apa.org/monitor/2022/03/career-navigating-therapy)

- **Improving Sibling Relationships**:  
  Eight in 10 children in the United States are growing up with a sibling—more than the number of kids living with a father. Over a lifetime, siblings are often the people with whom an individual will ultimately share the most years. Psychologists’ research can help to improve these important relationships. Hear more about how our siblings influence our lives on APA’s Speaking of Psychology podcast: [https://www.apa.org/news/podcasts/speaking-of-psychology/siblings](https://www.apa.org/news/podcasts/speaking-of-psychology/siblings)

**February-March, 2022:**

A number of members have expressed a wish to know what practitioners are doing around the world with regard to COVID in their practices. We would be grateful if you could let us know what issues have arisen (including those outlined by the APA below) and how practitioners are dealing with them. Feedback appreciated.
